EDUCATION

University

August 2022 - Present

B.S. in Computer Science

College of Mary Immaculte Inc.

CERTIFICATIONS

- [Certificate of Participation](#)

Harnessing the power of A.I. for Progress and Development

SKILLS

- HTML, CSS, JavaScript
- PHP/ MySQL
- Figma
- Git/GitHub Virtual Machines (Oracle/Ubuntu)
- Python

REFERENCE

- Joseph Bernardo Reyes**
0992 234 6806
College of Mary Immaculate Inc.

PROFILE

Motivated Computer Science student with a passion for front-end development and user-friendly web design. Proficient in HTML, CSS, JavaScript, PHP, and Python, with experience in UI/UX design using Figma and database management with MySQL. Familiar with Git/GitHub and virtual machine environments. Seeking an OJT internship to apply technical skills, gain hands-on experience, and contribute to innovative web development projects.

RELEVANT PROJECTS

CUDDLEPAWS

[Pet Store E-Commerce](#)

- Developed a fully functional online pet store platform for browsing, searching, and purchasing pet supplies with a user-friendly interface.
- Utilized PHP and MySQL for secure transactions, efficient database management, and seamless shopping experiences.
- Designed the UI/UX using Figma, incorporating an intuitive layout, interactive shopping cart, and streamlined checkout process.
- Implemented an admin panel for inventory management, enabling administrators to add, update, or remove products securely.

LOTTONG PINOY

[Minute-Lotto App](#)

- Created a web-based lottery simulation game that generates random lottery numbers for quick virtual play.
- Developed using JavaScript, HTML, and CSS to ensure a responsive and interactive experience.
- Designed as a Single Page Application (SPA) for seamless and fast interactions.
- UI/UX was designed using Figma, featuring an intuitive interface with instant result feedback to enhance user engagement.

COMMUNIQUE

[Thread-App Clone](#)

- A social networking application inspired by Threads, offering real-time updates, user interactions, and a seamless digital experience. The platform fosters engagement through an interactive and dynamic feed where users can post updates and engage in discussions.
- JavaScript, Figma
- Designed using Figma to focus on a visually appealing and user-friendly layout. The application is developed as a Single Page Application (SPA) using vanilla JavaScript, ensuring smooth and fast-loading interactions without requiring full-page reloads. The app dynamically updates content, providing a real-time experience for users.
